I'm 20 years old, I'm passionate about programming and nerd enthusiast

Professional Experience

- **UENP - Universidade Estadual do Norte Paraná** **Bandeirantes PR**
Institutional Technological Initiation Scholarship Program - Araucária Foundation 2021 - 2022

Primary Skillset

- **Programming languages:** Java, Python, PHP, C/C++, SQL.
- **Technologies:** Laravel, PostgreSQL, HTML, CSS.
- **Keep learning:** JavaScript, TypeScript and ReactJs
- **Methodologies:** SOLID, XP, SCRUM.

Notable Projects and Interests

- **Research Area:** Software Engineering, mentored by PhD André Luís Andrade Menolli. The research focused on the development of a website to expose the technologies and services of public universities in northern Paraná, with flexibility for private institutions. PHP, Blade, Laravel Framework and PostgreSQL technologies were used, as well as MVC architecture concept and Design Thinking.
- **Participation in events/Hackathons:**
FrontHack: Hackathon winner focused on the front-end, using ReactJs as the main technology, with the proposal to bring the best solution for tourism in the city of Bandeirantes-PR. The App focus on religious tourism, due to the fact that the city has the third largest Sanctuary of Saint Michael the Archangel in the world.
Genius Hackathon: Winner of the Hackathon focused on developing a solution for agriculture made in ReactJS.
